

There isn't a
better time
to be young and
Indian !

Are you ready
to make the most of it?

Young Indians
Summit

10-11 March 2004
Vigyan Bhawan, New Delhi

Confederation of Indian Industry

Discover

an opportunity called India

For a long time now, India was seen as a sleepy, slow moving giant and ignored by the world at large. But today, liberal economic reforms and its high IQ, English speaking brainpower has changed all that. Today, India is awakening to a new power within herself.

Quietly, but with breathtaking speed, Indian engineers, IT specialists, medical and business graduates are winning accolades on the world stage and changing the way the world looks at India. Indians are writing the new software of progress. Indian brainpower is reshaping the global corporate world and is colonising cyberspace.

Today, India is the biggest site for nearly one third of new IT development work for big U.S. companies. Companies are shifting bill payment, human resources and other functions to new, paperless centres in India. Indian finance whizzes are spicing up Wall Street and Indian engineers are prized assets in Silicon Valley start ups. The Business Process Outsourcing (BPO) and the call centre boom has made work opportunities explode in India. Opportunities in other high profile sectors like auto-ancillary, healthcare, tourism, pharmaceuticals, etc. are also taking off.

On other fronts too India is making waves. More Indian companies are making it to the Forbes Best and Fortune 500 lists. Indian exports across various sectors are expected to cross \$103 billion. The 'made in India' label is highly visible on the global marquee. It's predicted that India would be the third largest economy after China and the U.S. by 2050. The future has never been more promising.

Right now, our wonderful country has a once-in-a-lifetime opportunity to realise its full potential. A future of plenty is opening up right here, right now. You can be the spark of a tiny change that could make a world of difference to an individual and society. Are you ready to make the most of it, for yourself and for India?

We Young Indians are ready to support you all the way.

Young Indians

Come and shape your future,
and India's. Now.

Young Indians (Yi) is a group of young and successful Indian professionals from diverse fields and is part of the Confederation of Indian Industry (CII). We believe that the responsibility of developing India lies in the hands of the younger generation and Yi will become the platform for Indian youth who dream of a great India. Our principal objectives are:

- Involve young Indians in shaping India
- Develop an India positive mindset
- Learn from each other

We plan to adopt an action-oriented "We Can, We Will" approach towards achieving the above objectives, encourage and inspire pride in being Indian, help build a Brand India globally and become the voice of the Indian youth. You can help, by being a Young Indian for Young Indians.

Unleashing the India opportunity

India is relatively a young country, with 75% of the population below the age of 45.

By 2020, India is destined to have the world's largest population of young working people and consumers.

The Summit Objectives

Yi aims to bring together youth and leaders from many institutions including business, government, local communities, NGO's etc. to share experiences on:

- Opportunities available in India today
- Undertaking activities which promote development of society on a sustainable basis
- Geo-political developments and their impact on India
- A Young Indian's vision for India
- How to facilitate youth from different strata of society to work effectively together to produce faster change in the country that will benefit the many millions of young people

The Need

- Harness the boundless energy, zeal and entrepreneurial ideas of young Indians and give it focus and direction.

- Provide the leadership and inspiration to properly capitalise on India's innate potential, brainpower, resourcefulness and the basic infrastructure.
- Draw upon the power of dynamic business and youth icons and use them to motivate young Indians and make them feel positive about the infinite opportunities available, even help create them. Once this happens, then automatically the larger perspective of helping India becoming a developed nation will be achievable.

Our Plan

- Work with young Indians in schools and colleges and give them a channel to voice their views.
- Develop leaders and mentors among young Indians through specific programs.
- Spark off a movement of change and spread the message through various other activities, networking and fun events.
